CC-220 / CC-330 / CC-330S

Die cut
Perforation and die cut (optional)
Creasing and die cut (optional)

APPLICATION

Ideal for business cards, postcards, photos, greeting cards, tickets and so on.
Suits for printing shops, design shops, DIY shops, online shops, supermarkets, and more.

PRODUCT PROFILE

The VICUT card cutter CC330 and CC220 is designed for automatic cutting many types of paper cards with fast speed, it is controlled by a micro-computer offering convenient cutting through preset layouts for consistency and ease of use. The interchangeable cutting cassette offers more optional functions such as creasing and perforating, and the cutting size also can be customized.

Works along with any digital printer, or even digital photocopier, the card cutter CC330/CC220 can produce professionally-cut business cards, postal cards, photos, tickets and so on. Warmly welcomed by the printing shops, DIY photo shops and design companies, thanks to its affordable cost, flexible functions and fast speed.

MAIN FEATURES

Fully automation

Automatic sheet feeding system delivers fully auto process for card cutting.

Automatic counting

The control system count the cutting times and memory it, to help users better judge the use of knife.

Fast cutting speed

Cuts 150pcs cards per minute.

Cuts up to 400gsm

CC-330/CC220 can cut up to 400gsm CCP paper without deterioration of sharpness of knife and no slow down.

Customized cutting size

Thanks to the interchangeable cutting cassette, the cutting size of the card can be customized according to the user's requirements.

Support various sheet size

Suitable for A3+, SRA3, A3 and A4 paper sheet sizes, capable for cutting different business cards sizes all over the world.

Simple and safe operation

Built in cutting cassette design, to avoid safety hazards. Once sheets ready, one click to start the cutting process, easy to operate even for beginners.

Efficient and stable cutting system

The cutting blades are self-sharpening and do not require maintenance. One set of cutting cassette can cut 300K time continually, it means, one cutting cassette can produce about 100k standard business cards.

Image shift compensation

Cut marks registration compensates the offset, ensure that the cutting accuracy will not be affected by material printing error or placement shift.

DETAILS DESCRIPTION

User-friendly control panel

The control panel is easy to operate, users can select the appropriate template from the existing layout for cutting, and clearly see the number of cutting times from the display screen.

Replaceable cutting cassette

Users can customize different sizes of cutting cassette, so as to realize multi-purpose of one machine. It's very easy to replace the cutting cassette, just need to loosen and tighten two thumb screws.

Self-sharpening cutting wheels

In the cutting process, the cutting blade grinds itself through the grinding wheels to keep the blade sharp and not blunt because of the long cutting time.

Dual roller auto-feeding paper tray

The new version feeding structure allows the paper tray to hold up to 70 sheets per time. Dual roller structure makes paper feeding easily and smoothly.

Moveable waste collection tray

During the cutting process, the scraps will be separated automatically and fall into the movable collection tray below, so that the scraps can be cleaned at any time.

Detachable card collection tray

The card cutter is equipped with adjustable card collection tray. By changing its installation mode, it can accommodate business cards of different sizes, even large postcards and photos.

Big size card collection tray (optional for CC-330/CC-330S)

An optional large size collection tray is provided for finishing big size cards and photos.

Cabinet stand (only for CC-330S)

With a cabinet stand, card cutter CC-330S can work easily without additional working table. The cabinet can also collect cutting waste and pack enclosed the card cutter to become an independent small production line.
